

## 2025 Baja SAE Design Finals Procedures

The 2025 Design Finals procedure is the same basic procedure as the 2024 Design Finals procedure. Teams with the top Design Evaluation scores will compete in Design Finals. Design Finals will be held after the close of Design Evaluation. The finalists will be granted 15 minutes from the time of announcement to assemble in the Design Evaluation area. A presentation format will be followed. Each team will be evaluated in a **20**-minute period. Details of that period are listed below.

- **15 minutes** for the combined Overall Vehicle and Vehicle Level Engineering Presentations. This is expected to be the same presentations that were given during initial design.
- **5 minutes** for questions from judges. Judges will hold all questions until after the 15-minute presentation is completed and only ask questions during this 5-minute period.
- Scoring will take place after all design finals presentations have been given. The panel of finals judges will assess each finalist team from an overall perspective and determine the ranking of the finalists and bonus points.
